Application

FOLIAR

Supplemental Label for Use on Potato

Follow all applicable directions, warnings and use precautions on the container label. This supplemental label must be in the possession of the user at the time of application.

Potato Rate and Application Timing

Apply 1 pint/acre as a foliar spray when plants have 6-8 leaves, pre-bloom/bloom initiation and at tuber initiation with a maximum of 3 pints/acre in a single growing season.

Aerial Application – Apply recommended rate in a minimum of 3 gallons of water per acre.

Ground Application – This product may be applied with all types of ground spraying equipment. Apply recommended rate in 3 or more gallons of water per acre. Verdesian Life Sciences recommends using a non-ionic surfactant in herbicide tank mixes including Take Off LS. Do not use this product with organosilicone surfactants or with any adjuvants or surfactants that lower pH of the tank mix to less than 4.5.
